

# AURO

## Overview of our product range „Brilliant ideas“

# AURO

This overview shows the current range of AURO cleaning, care and maintenance products from our “Brilliant Ideas” assortment. These products make their impact with the cleaning power of natural ingredients and therefore are particularly gentle. Synthetic scents and irritants that could harm the skin get left out.

Using AURO products is a contribution to environmental protection because our products are biologically degradable. Thus an additional pollution of waters is avoided.

## **Biological and controlled**

For the production of our products, we also use oils and fats from controlled biological farming and raw materials that have an ECOCERT certification and thus guarantee highest biological standards. In addition to that, we often use oils from rapeseed, linseed or soya that are tested by the Institute for Market Technology.

## Floors
